

## Feed the Birds!

Bird cakes are very good all year round for birds to eat. They are easy to make so have a try at home and then watch the wildlife appear in your garden.

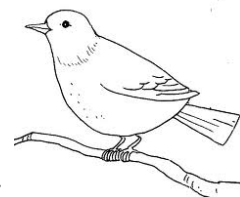

With this recipe it needs to be -

- one third fat (lard, margarine) and
- two thirds should be the food mixture  
(Oatmeal, cheese, seeds, nuts or dried fruit)

It's very simple you just -

- Mix fat and food mixture together
- Then mould a small ball shape and stick it onto the branches or trunk of a tree .

Watch and see if any birds come along and eat the bird cakes
