

Mathematics –Number Quantity

What you will need:

- A set of small bowls, you could use cake cases or plastic cups
- A selection of small objects, cereals or other dry foods
- Numbers 1-10

What to do

- Place the numbers in order from 1-10
- Place a number onto each of the bowls or cake cases
- Demonstrate to your child by placing the corresponding number of objects into the correct numbered bowl or case.

How will you help your child ?

This activity helps your child develop an understanding of number quantity and become familiar with the numerals 1 to 10.
