

Caterpillars Wriggle

Caterpillars wriggle,
Hyenas like to giggle,
Flamingos like to stand in the Pink!
But we like to jump, jump, jump, jump
We like to jump, what do you think....?

We like to tap....
We like to clap...
We like to twirl...
We like to tickle....

Ask your child to think of other actions to go into the song and have fun together making up new verses, while developing their language and gross motor skills and balance.

Counting Caterpillars

Go for a walk and collect a selection of different sized stones or leaves. Make your own 'Wriggly Caterpillar' by putting them in order from biggest to smallest and adding a face to the head. See how long your caterpillar is by counting the stones in his body. Can you make it longer or shorter by adding more stones or taking some away? Maybe you could make a whole family of caterpillars of different sizes? We would love to see them!!

Handprint Flamingos

Make your own Flamingos standing in the pink! Paint your hand with pink paint and press it down on the paper to make the body, add a head with eyes and a beak and long legs using pens or collage items. Try painting your grown ups hands too, to make different sized flamingos! Have Fun!!
