Social Media/ Networking Sites-

As we all know Social networking sites such as Facebook and Twitter are now widely used. This type of media allows people to communicate in ways that were not previously possible. However, such sites can be inappropriately used by some as a means of expressing negative or offensive views about schools and their staff.

Although social networking sites may appear to be the quickest and easiest way to express frustrations or concerns about the School (and those associated with it), it is rarely appropriate to do so. Other

channels, such as a private and confidential discussion with the School, or using the School's formal complaints process are much better suited to this.

The School considers the following examples to be inappropriate uses of social networking sites. (This list is non-exhaustive and intended to provide examples only):

- Making allegations about staff or pupils at the School/cyber-bullying;
- Making complaints about the School/staff at the School;
- Making defamatory statements about the School or staff at the School;
- Posting negative/offensive comments about specific pupils/staff at the School;
- Posting racist comments;
- Posting comments which threaten violence.

Please can we ask for you co-operation in following these guidelines when using Social media/ Networking sites.
